

Project Data Sheet:

Client Name: NHS
Sector: Healthcare
Main Contractor: Neilcott Construction
Project: Ashford Hospital
Location: South East - Middlesex
Date: September 2012

Description: Ashford Hospital, situated on the A30 to the west of London, provides a wide range of medical and mainly day surgical services, outpatients services, ophthalmology, a dedicated stroke rehabilitation unit and the Ashford Health Centre and Rapid Access Centre.

The construction of a new entrance and reception area at the busy working hospital required careful planning and execution with construction and flooring work split into six separate phases, with Avonline Flooring teams operating behind temporary hoardings to minimize noise, dust and inconvenience to patients.

Key Challenge? Bespoke designs, denoting walkways, routes and other key information, were cut into the vinyl flooring.

Floor preparation: Damp proof membrane and latex

Finishes: Vinyl flooring and entrance matting
